

News Release

Intel Reports Second-Quarter Revenue of \$13.8 Billion

**Achieves Record Quarterly Microprocessor Unit Shipments
Net Income of \$2.8 Billion, Up 40 Percent Year-Over-Year
Targets \$4 Billion for Share Repurchases in the Third Quarter**

SANTA CLARA, Calif., July 15, 2014 -- Intel Corporation today reported second-quarter revenue of \$13.8 billion, operating income of \$3.8 billion, net income of \$2.8 billion and EPS of \$0.55. The company generated approximately \$5.5 billion in cash from operations, paid dividends of \$1.1 billion, and used \$2.1 billion to repurchase 74 million shares of stock.

“Our second-quarter results showed the strength of our strategy to extend the reach of Intel technology from the data center to PCs to the Internet of Things,” said Intel CEO Brian Krzanich. “With the ramp of our Baytrail SoC family, we have expanded into new segments such as Chrome-based systems, and we are on track to meet our 40 million unit tablet goal. In addition, we hit an important qualification milestone for our upcoming 14nm Broadwell product, and expect the first systems to be on shelves during the holidays.”

Intel announced that it intends to return more cash to shareholders by lowering its cash balance further through increased share repurchases. The board of directors authorized an increase of \$20 billion to its share repurchase program and the company is forecasting share repurchases of approximately \$4 billion in the third quarter, with additional share repurchases in the fourth quarter. Over the last decade Intel has returned almost \$90 billion to shareholders through dividends and share repurchases.

"This change in our capital structure is the continuation of a multi-year focus on creating value and returning cash to our shareholders, and reinforces our confidence in the business," said Stacy J. Smith, Intel CFO and executive vice president.

Q2 Key Business Unit Trends

- PC Client Group revenue of \$8.7 billion, up 9 percent sequentially and up 6 percent year-over-year.
- Data Center Group revenue of \$3.5 billion, up 14 percent sequentially and up 19 percent year-over-year.
- Internet of Things Group revenue of \$539 million, up 12 percent sequentially and up 24 percent year-over-year.
- Mobile and Communications Group revenue of \$51 million, down 67 percent sequentially and down 83 percent year-over-year.
- Software and services operating segments revenue of \$548 million, down 1 percent sequentially and up 3 percent year-over-year.

Business Outlook

Intel's Business Outlook does not include the potential impact of any business combinations, asset acquisitions, divestitures, strategic investments and other significant transactions that may be completed after July 15.

Q3 2014

- Revenue: \$14.4 billion, plus or minus \$500 million.
- Gross margin percentage: 66 percent, plus or minus a couple of percentage points.
- R&D plus MG&A spending: approximately \$4.9 billion.
- Restructuring charges: approximately \$20 million.
- Amortization of acquisition-related intangibles: approximately \$65 million.
- Impact of equity investments and interest and other: approximately zero.
- Depreciation: approximately \$1.9 billion.
- Tax rate: approximately 28 percent.

Full-Year 2014

- Revenue: growth of approximately 5 percent, slightly higher than prior expectations.
- Gross margin percentage: 63 percent, plus or minus a couple percentage points, in line with prior expectations.
- R&D plus MG&A spending: \$19.3 billion, plus or minus \$200 million, slightly higher than prior expectations of \$19.2 billion.
- Amortization of acquisition-related intangibles: approximately \$300 million, unchanged from prior expectations.
- Depreciation: approximately \$7.4 billion, unchanged from prior expectations.
- Tax rate: each of the remaining quarters of 2014 is still expected to be approximately 28 percent, unchanged from prior.
- Full-year capital spending: \$11.0 billion, plus or minus \$500 million, unchanged from prior expectations.

For additional information regarding Intel's results and Business Outlook, please see the CFO commentary at: www.intc.com/results.cfm.

Status of Business Outlook

Intel's Business Outlook is posted on intc.com and may be reiterated in public or private meetings with investors and others. The Business Outlook will be effective through the close of business on September 12 unless earlier updated; except that the Business Outlook for amortization of acquisition-related intangibles, impact of equity investments and interest and other, restructuring charges, and tax rate, will be effective only through the close of business on July 22. Intel's Quiet Period will start from the close of business on September 12 until publication of the company's third-quarter earnings release, scheduled for October 14. During the Quiet Period, all of the Business Outlook and other forward-looking statements disclosed in the company's news releases and filings with the SEC should be considered as historical, speaking as of prior to the Quiet Period only and not subject to an update by the company.

Risk Factors

The above statements and any others in this document that refer to plans and expectations for the third quarter, the year and the future are forward-looking statements that involve a number of risks and uncertainties. Words such as “anticipates,” “expects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “may,” “will,” “should” and their variations identify forward-looking statements. Statements that refer to or are based on projections, uncertain events or assumptions also identify forward-looking statements. Many factors could affect Intel’s actual results, and variances from Intel’s current expectations regarding such factors could cause actual results to differ materially from those expressed in these forward-looking statements. Intel presently considers the following to be important factors that could cause actual results to differ materially from the company’s expectations.

- Demand for Intel's products is highly variable and, in recent years, Intel has experienced declining orders in the traditional PC market segment. Demand could be different from Intel's expectations due to factors including changes in business and economic conditions; consumer confidence or income levels; customer acceptance of Intel’s and competitors’ products; competitive and pricing pressures, including actions taken by competitors; supply constraints and other disruptions affecting customers; changes in customer order patterns including order cancellations; and changes in the level of inventory at customers.
- Intel operates in highly competitive industries and its operations have high costs that are either fixed or difficult to reduce in the short term.
- Intel's gross margin percentage could vary significantly from expectations based on capacity utilization; variations in inventory valuation, including variations related to the timing of qualifying products for sale; changes in revenue levels; segment product mix; the timing and execution of the manufacturing ramp and associated costs; excess or obsolete inventory; changes in unit costs; defects or disruptions in the supply of materials or resources; and product manufacturing quality/yields. Variations in gross margin may also be caused by the timing of Intel product introductions and related expenses, including marketing expenses, and Intel's ability to respond quickly to technological developments and to introduce new products or incorporate new features into existing products, which may result in restructuring and asset impairment charges.
- The tax rate expectation is based on current tax law and current expected income. The tax rate may be affected by the jurisdictions in which profits are determined to be earned and taxed; changes in the estimates of credits, benefits and deductions; the resolution of issues arising from tax audits with various tax authorities, including payment of interest and penalties; and the ability to realize deferred tax assets.
- The amount, timing and other execution of Intel's stock buyback program could be affected by changes in Intel's priorities for the use of cash for other purposes, such as operational spending, capital spending, acquisitions, and because of changes in cash flows and changes in tax laws.
- Gains or losses from equity securities and interest and other could vary from expectations depending on gains or losses on the sale, exchange, change in the fair value or impairments of debt and equity investments; interest rates; cash balances; and changes in fair value of derivative instruments.
- Intel's results could be affected by adverse economic, social, political and physical/infrastructure conditions in countries where Intel, its customers or its suppliers operate, including military conflict and other security risks, natural disasters, infrastructure disruptions, health concerns and fluctuations in currency exchange rates.
- Intel’s results could be affected by the timing of closing of acquisitions, divestitures and other significant transactions.

- Intel's results could be affected by adverse effects associated with product defects and errata (deviations from published specifications), and by litigation or regulatory matters involving intellectual property, stockholder, consumer, antitrust, disclosure and other issues. An unfavorable ruling could include monetary damages or an injunction prohibiting Intel from manufacturing or selling one or more products, precluding particular business practices, impacting Intel's ability to design its products, or requiring other remedies such as compulsory licensing of intellectual property.

A detailed discussion of these and other factors that could affect Intel's results is included in Intel's SEC filings, including the company's most recent reports on Form 10-K and Form 10-Q.

Earnings Webcast

Intel will hold a public webcast at 2 p.m. PDT today on its Investor Relations website at www.intc.com. A webcast replay and MP3 download will also be available on the site.

Intel plans to report its earnings for the third quarter of 2014 on October 14. Immediately following the earnings report, the company plans to publish a commentary by Stacy J. Smith, Intel CFO and executive vice president, at www.intc.com/results.cfm. A public webcast of Intel's earnings conference call will follow at 2 p.m. PDT at www.intc.com.

About Intel

Intel (NASDAQ: INTC) is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. As a leader in corporate responsibility and sustainability, Intel also manufactures the world's first commercially available "conflict-free" microprocessors. Additional information about Intel is available at newsroom.intel.com and blogs.intel.com and about Intel's conflict-free efforts at conflictfree.intel.com.

In the first three months of 2014, we formed the Internet of Things Group, which includes platforms and software optimized for the Internet of Things market segment. Additionally, we changed our organizational structure to align with our critical objectives, which changed information that our Chief Operating Decision Maker (CODM) reviews for purposes of allocating resources and assessing performance. After the reorganization, we have nine operating segments: PC Client Group, Data Center Group, Internet of Things Group, Mobile and Communication Group, McAfee, Software and Services Group, Non-Volatile Memory Solutions Group, Netbook Group, and New Devices Group. All prior-period amounts have been adjusted retrospectively to reflect these operating segment changes, as well as other minor reorganizations.

Our operating segment results shown above are comprised of the following:

- **PC Client Group:** Delivering platforms designed for the notebook (including Ultrabook™ devices and 2 in 1 systems) and the desktop (including all-in-ones and high-end enthusiast PCs); wireless and wired connectivity products; as well as home gateway and set-top box components.
- **Data Center Group:** Delivering platforms designed for the server, workstation, networking and storage computing market segments.
- **Internet of Things Group:** Delivering platforms designed for embedded market segments including retail, transportation, industrial, and buildings and homes, along with a broad range of other market segments.
- **Mobile and Communications Group:** Delivering platforms designed for the tablet and smartphone market segments; and mobile communications components such as baseband processors, radio frequency transceivers, Wi-Fi, Bluetooth*, global navigation satellite systems, and power management chips.
- **Software and services operating segments** consists of the following:
 - McAfee: A wholly owned subsidiary delivering software products for endpoint security, network and content security, risk and compliance, and consumer and mobile security.
 - Software and Services Group: Delivering software products and services that promote Intel architecture as the platform of choice for software development.
- **All other** category includes revenue, expenses, and charges such as:
 - Results of operations from our Non-Volatile Memory Solutions Group, Netbook Group, and New Devices Group;
 - Amounts included within restructuring and asset impairment charges;
 - A portion of profit-dependent compensation and other expenses not allocated to the operating segments;
 - Divested businesses for which discrete operating results are not regularly reviewed by our CODM;
 - Results of operations of startup businesses that support our initiatives, including our foundry business;
 - Acquisition-related costs, including amortization and any impairment of acquisition-related intangibles and goodwill.
